

The diagram illustrates the safe zone for a 90x50 print. It features a large light gray rectangle representing the safe zone, enclosed by a dashed blue line. This is further surrounded by a solid magenta line, which is itself inside a solid blue line representing the final print area. On the left side, a circular callout provides a detailed view of the margins: a vertical magenta line is labeled 'leikkuu vara' (cut margin), a thin white gap is labeled 'kortin reuna' (card edge), and the light gray area is labeled 'turva-alue' (safe area). Centered within the safe zone is the text '90x50' and a note in Finnish stating that graphics within this area will be clearly visible in the final product.
